Description of violations and recommendations for corrections: 3745-27-05(C) - Foundry sand, fly ash, cardboard, wood scraps, etc., from the Osco Industries, Inc., Jackson Plant, have been open dumped beside your cardboard recycling building.

The regulations require that if the material is accepted at your landfill for disposal, it must be taken to the working face.

I realize that some of this material is hot and must be allowed to cool before landfilling but this should also be done at the working face of the landfill in order to comply with Section 3745-27-08(E) of the Ohio Administrative Code that requires confined unloading.

The existing open dump site should be immediately covered with two feet of soil and then seeded by May 1, 1986.

Upon checking our files on hazardous waste generators, I discovered that Osco Industries have indicated that they are a hazardous waste generator. Therefore, as we discussed during our meeting of December 12, 1985, I recommend that you consider not accepting their waste for disposal until we can determine if they are a generator, what the waste is, and how they are treating or disposing of it.

If you have any questions concerning Osco Industries waste, please contact Mr. Brian Blair of this office. cc: B. Blair cc: Joe Speakman, DSHWM, CO cc: Jackson Co. Health Commission

You are hereby notified of the above violations. Failure to correct these violations within immediately days may result in the revocation, suspension or denial of your solid waste disposal license or other legal action.

If assistance in correcting these violations is desired, contact your Local Health Department and/or district office of the Environmental Protection Agency.
